## PNC INC. – CORONAVIRUS BUSINESS CONTINUITY

3/23/2020

On March 22<sup>nd</sup>, 2020, New Jersey Governor Phil Murphy announced all non-essential businesses are to close their physical locations.

After review of the letter we received from the *Under Secretary of Defense* and review of the information provided by the governor's office and discussion with our local representatives, **PNC, Inc. is considered a life-sustaining business and will continue to remain open.** We provide electronics for various critical defense and medical product companies who makes ventilators and other lifesaving equipment used in ICU and critical care departments.

PNC takes great pride in being able to support the businesses that are contributing to public health around the world. We appreciate your continued confidence in PNC Inc during this critical time and look forward to a safer and healthier climate for all.

Best Regards,

  
Sam Sangani  
President
